Seeking awesomeness in agile testing workshop

Derk-Jan De Groot

About Derk-Jan De Grood

Derk-Jan de Grood works for Valori as Senior Test Manager and Agile Transition Coach. As a consultant he helps organizations with their Scrum adoptions and embedding a quality strategy. He is an experienced trainer, workshop host and a regular speaker at conferences like Agile Testing Days, the Seoul Testing Conference, EXPO:QA, Freetest and the STAR conferences in Europe and America. He wrote several successful books on software testing and frequently publishes articles and columns for major magazines. On his own blog he shares his knowledge and experience for everyone to benefit. In 2014 he won the EuroSTAR testing excellence award. In 2016 he published an agile book: *Agile in the real world, starting with Scrum*.

General information

23rd May

From 9am to 5pm

Location: Infragistics' office (Echevarriarza 3333 between Osorio and Pereyra de la Luz)

Spots: 30

Attendees have to bring their computer.

Activity in English.

Price: 200 dollars + VAT. Price includes lunch and 2 coffee breaks.

Workshop description

In agile development testing has become a responsibility of the whole development team. Many testers wonder what their role is now that everyone is testing. In order to distinguish ourselves we should master the profession, no doubt. Both the stakeholders and the developers should experience that we add value, so we should be great in those activities that matter and being able to show the value we add. In this full day tutorial, we'll have a close look at the activities and artifacts that we testers spent our time and energy on. We'll embed them in an agile test strategy and will establish a collective feeling about what matters in the eye of the stakeholder and dev-team. Let's be critical and look at ourselves in the mirror: how good are we really in the things that we do? Finally, we'll put our insights to practice. Participants will execute a exploratory test session, but not before the created a strategy that includes the lessons learned of the morning session. At the end of the day all participants with a clear idea of how to align their test activities with the needs, they'll know where they master the profession and what needs improvements. But more, they'll have the know-how to embed the individual actions into a strategy that enables them to tell a compact testing story that convinces stakeholders that testing adds value to them.

The day after

The outcome of this session can be used for individual testers to increase their added value and to start a discussion within their own team or test guild. Delegates will make their own action plan on how to improve themselves and formulate what they need to do in order to become awesome agile testers.
